Conflict-related sexual violence aims to dehumanize survivors through calculated acts of cruelty to render survivors and their communities powerless. Survivor-centered approaches to policy, programming and research are expanding, yet there is a need for a clearer understanding of what a survivor-centered approach to addressing conflict-related sexual violence means and how to implement it.

Looking Ahead: New Approaches and Breaking Down Silos for Impact

1:00pm - 2:20pm | Integrating Conflict-Related Sexual Violence Across Policy Agendas

Conflict-related sexual violence displaces people, destroys communities, silences victims and warns of wider atrocities. It undermines reconciliation efforts and the transition to more secure and peaceful societies. Yet, opportunities to integrate prevention and mitigation efforts and jointly leverage resources continue to be missed. How can we effectively move beyond policy siloes that continue to limit action against conflict-related sexual violence?
